

## Front left adapter Iveco

Step 1:

The adapter must be placed just behind the gearbox cradle and is fixed using the three M8 screws supplied, without drilling any holes on the frame if the frame is of the latest model (BLACK) otherwise drill the 3 holes.

Step 2:

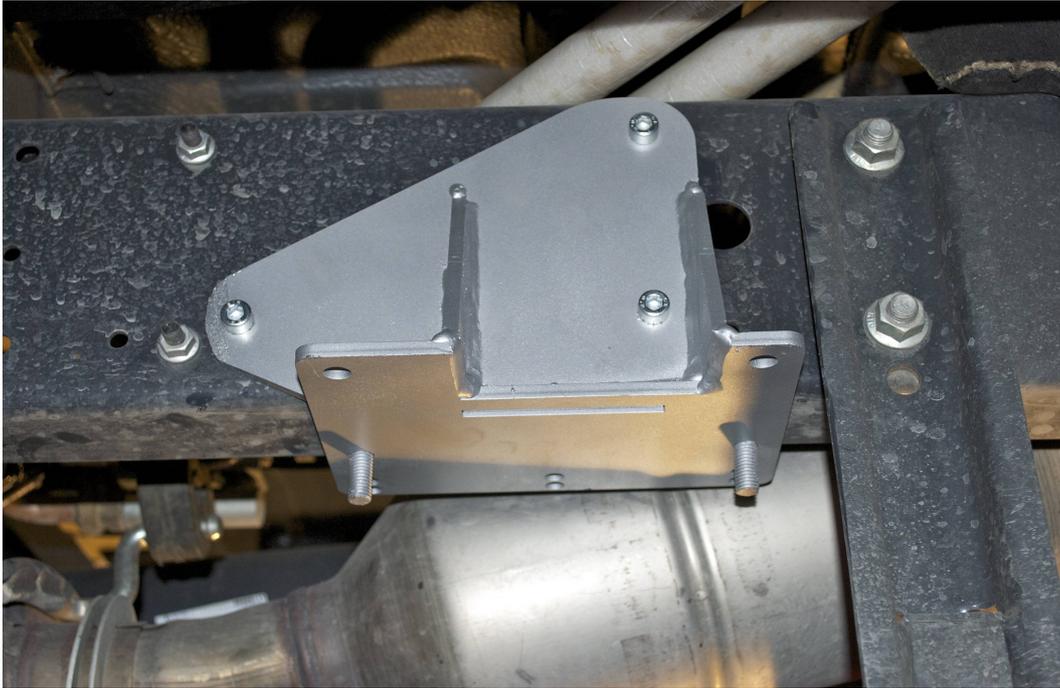

Then mount the clamp on the inside of the frame.

**JACK WITH MOTOR OUTSIDE OF VEHICLE AND ROTATION REAR**

## Front right adapter Iveco

Step 1:

The adapter must be placed just behind the gearbox cradle, follow the same procedure as the front left adapter

Punto 2:

Then mount the clamp on the inside of the frame.

**JACK WITH MOTOR OUTSIDE OF VEHICLE AND ROTATION REAR**

## Rear left adapter Iveco

Step:

Put the adapter rear the rear axle, be carefull that the adapter is completely insert before drill the holes, is some case is possible to use holes already present on the chassis.

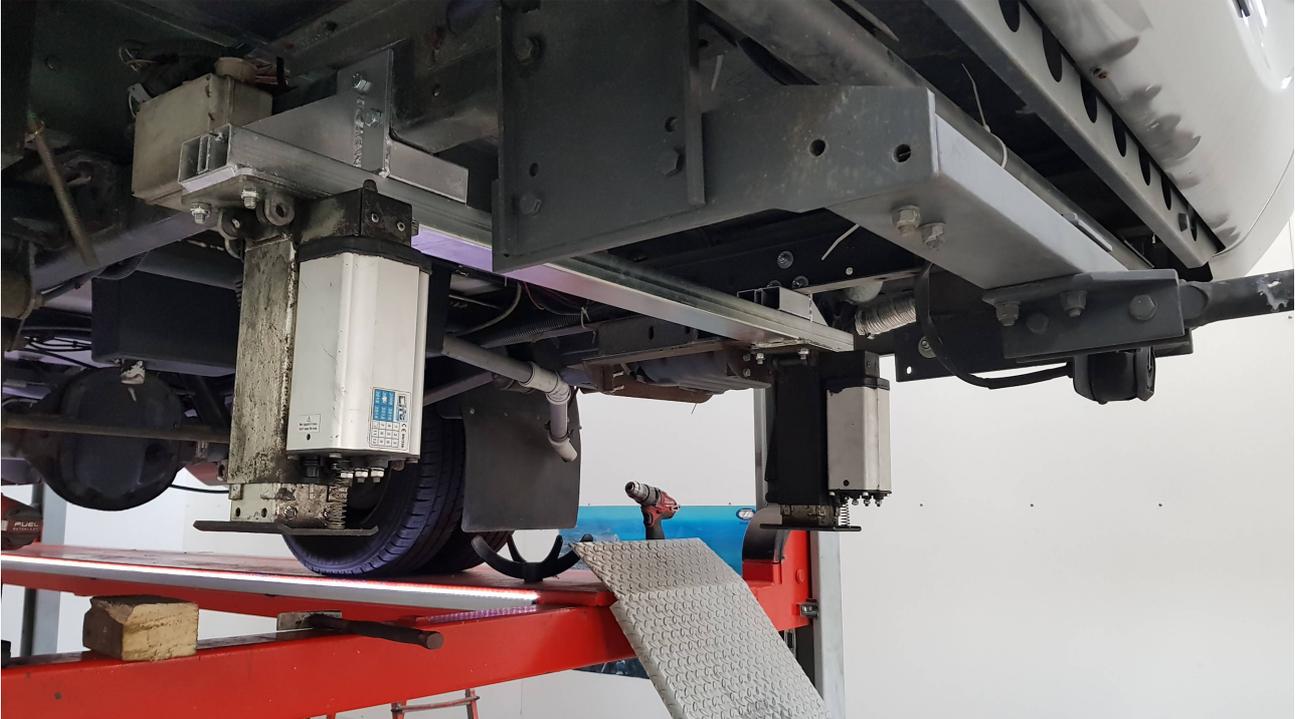

Step 2:

Fit the jack (follow the manual for adjustments)

**FIT THE JACKS IN THE MOST COMFORTABLE POSITION FOR THE TRAVEL POSITION, THE ADAPTER IS PREPARED FOR FIT THE JACK IN DIFFERENT SETTING**
